RESPONSE TO OFFICE ACTION Appln. No. 10/551,813

Response Mailed October 8, 2010

## Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of claims:

- 1. (Previously presented) A composition of functional additives useful for incorporating in water as a dip for the preservation of cut apple pieces comprising ascorbic acid and calcium ions, wherein the molar ratio between the ascorbic acid and the calcium ions is between about 2.8:1 to about 4.0:1, and wherein the composition further comprises magnesium ions, and the weight ratio between the calcium ions and magnesium ions is between about 5.4:1 and about 11.3:1.
- 2. (Original) A composition according to claim 1 wherein the molar ratio is between about 2.8:1 to about 3.5:1.

## 3. (Cancelled)

- 4. (Previously presented) A composition according to claim 1, wherein magnesium ions are derived from magnesium chloride hexahydrate or anhydrous magnesium chloride.
- 5. (Original) A composition according to claim 1 wherein the calcium ions are derived from one or more of the group consisting essentially of calcium chloride dihydrate, calcium hydroxide and calcium carbonate.
- 6. (Original) A composition according to claim 1 wherein the calcium ions are derived from calcium chloride dihydrate.
- 7. (Original) A composition according to claim 1 wherein the calcium ions are derived from calcium hydroxide.
- 8. (Original) A composition according to claim 1 wherein the calcium ions are derived from calcium carbonate.
- (Original) A composition according to claim 1 wherein the calcium ions are derived from calcium chloride dihydrate, calcium hydroxide and calcium carbonate.

RESPONSE TO OFFICE ACTION

Appln. No. 10/551,813

Response Mailed October 8, 2010

10. (Original) A composition according to claim 1 including sodium citrate or citric acid as a pH adjuster.

- 11. (Currently amended) A solution of functional additives useful for the preservation of cut apple pieces comprising:
  - a. ascorbic acid having a concentration between about 5.0% and 9% (w/w); and
  - calcium ions having a concentration between about 0.4% and 0.68% (w/w);
  - magnesium ions having a concentration between 0.06% and 0.10% (w/w);

[[c]]d. water;

wherein the molar ratio between ascorbic acid and the calcium ions is between about 2.8:1 and 4.0:1.

- 12. (Original) A solution according to claim 11 wherein the molar ratio between ascorbic acid and calcium ions is between about 2.8:1 and about 3.5:1.
- 13. (Cancelled)
- 14. (Currently amended) A solution according to claim [[13]]11 wherein the magnesium ions are derived from magnesium chloride hexahydrate or anhydrous magnesium chloride.
- 15. (Original) A solution according to claim 11 wherein the calcium ions are derived from one or more of the group consisting essentially of calcium chloride dihydrate, calcium hydroxide and calcium carbonate.
- 16. (Original) A solution according to claim 11 wherein the calcium ions are derived from calcium chloride dihydrate.
- 17. (Original) A solution according to claim 11 wherein the calcium ions are derived from calcium hydroxide.
- 18. (Original) A solution according to claim 11 wherein the calcium ions are derived from calcium carbonate.

Response Mailed October 8, 2010

19. (Original) A solution according to claim 11 wherein the calcium ions are derived from calcium chloride dihydrate, calcium hydroxide and calcium carbonate.

- 20. (Original) A solution according to claim 11 wherein the pH is adjusted with citric acid or sodium citrate.
- 21. (Currently amended) A solution of functional additives useful for the preservation of cut apple pieces comprising water and about 5.6% to 9% (w/w) ascorbic acid, about 0.3% to 1% (w/w) calcium chloride dehydrate, about 0.5% (w/w) magnesium chloride, and about 0.06% to 0.5% (w/w) calcium hydroxide dissolved in the water, the solution having a pH of 3.5 to 4.5.
- 22. (Original) A solution according to claim 21 further including about 0.5% to 1.0% (w/w) calcium carbonate.
- 23. (Cancelled)
- 24. (Original) A solution according to claim 21, wherein the pH is adjusted with citric acid or sodium citrate.
- 25-32. (Cancelled)
